Healing of the Whole Being

through the

Healing of the Spine

Initiated by the Spiritual Master Pjotr Elkunoviz

- A Multidimensional Expansion of Our Consciousness -

Tina

Difference in shoulder blades ca: 1 cm
 Difference in length of legs ca: 1 1/2 cm

Because of the curvature of the spine we see that the hips are different in height - so the length of the legs is also different when you measure in a sitting or lying position.

We can see that the spine is straightened, the hips are corrected and the length of the legs has been equalized.

A most important help for all kinds of sufferings

All our organs, governing centres and all parts of our body and psyche are connected to the spine. That is why our body and psyche come into a new balance when the spine is straightened.

- Causes for energy blocks on the spiritual, on the psychic and on the physical levels are transformed.
- A divine order manifests in our consciousness.
- The energies of life flow and the natural self-healing can take place.
- During a single healing the spine is straightened.
- Inclinations in the pelvic and hips are corrected along with the correction of the length of the legs and the position of the shoulder-blades.
- The Spinehealing takes place without touching of the body.

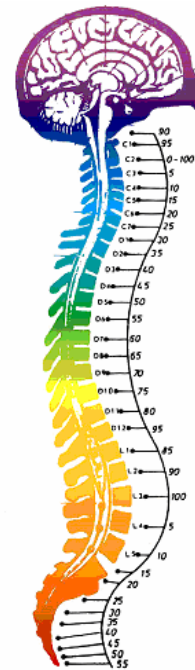

The schedule below shows the connection between the spine and the important governing functions of our body and of our psyche.
